

1 Papers

- ROULSTONE, I. Twistor Functions for Infrared Maxwell Fields. *Twistor Newsletter* **25**, Oxford University. September 1987.
- ROULSTONE, I. Dirac-Bergmann Constraints and the Semi-Geostrophic Equations. *Met. O. 11 Technical Note No. 42*. March 1990.
- ROULSTONE, I. and BRICE, S.J. Generalized Hamiltonian Methods and the Semi-Geostrophic Equations. *Preprint volume to the Eighth Conference on Atmospheric and Oceanic Waves and Stability, Denver, Colorado. 14th-18th October 1991*. A.M.S. 138-140
- ROULSTONE, I. Gravity Wave Phase Speeds form the Eigenmodes of the Unified Model. *Short-Range Forecasting Research Technical Report No. 25*. July 1992.
- CULLEN, M.J.P. and ROULSTONE, I. A Geometric Model of the Nonlinear Equilibration of Two-Dimensional Eady Waves. *J. Atmos. Sci.* **50**, 328-332. February 1993.
- ROULSTONE, I. Some Notes on Primitive and Quasi-Equilibrium Equations with a Hybrid Vertical Coordinate and Remarks on Hamiltonian Structure. *Forecasting Research Technical Report No. 42*. March 1993.
- SEWELL, M.J. and ROULSTONE, I. Anatomy of the Canonical Transformation. *Phil. Trans. R. Soc. Lond.*, **A345**, 577-598, 1993.
- ROULSTONE, I. and NORBURY, J. On the Hamiltonian Structure of the Semi-Geostrophic Equations. *Geometrical Methods in Geophysical Fluid Dynamics: Proceedings of the Woods Hole Summer Programme, 1993*. W.H.O.I. Tech. Rep. WHOI-94-12. 1994.
- ROULSTONE, I. and SEWELL, M.J. On the Structure of the Canonical Transformation. *Geometrical Methods in Geophysical Fluid Dynamics: Proceedings of the Woods Hole Summer Programme, 1993*. W.H.O.I. Tech. Rep. WHOI-94-12. 1994.
- ROULSTONE, I. and NORBURY, J. A Hamiltonian Structure with Contact Geometry for the Semi-Geostrophic Equations. *J. Fluid Mech.* **272**, 211-233, August 1994.
- SEWELL, M.J. and ROULSTONE, I. Families of Lift and Contact Transformations. *Proc. R. Soc. Lond.* **A447**, 493-512. 1994.
- ROULSTONE, I. On the application of Dirac constraints to variational data assimilation methods in meteorology. *Submitted to the conference on "New asymptotic methods in geophysical flows", Isaac Newton Institute, Cambridge, December 1994*.
- ROULSTONE, I. and BRICE, S.J. On the Hamiltonian formulation of the quasi-hydrostatic equations. *Quart. J. R. Meteorol. Soc.*, **121**, 927-936, April 1995.
- ROULSTONE, I. Two examples of classical scattering off fixed sources. *Twistor Newsletter* **39**, Oxford University. May 1995.
- ROULSTONE, I. A twistor description of scattering off fixed sources. *Classical and Quantum Gravity*, **12**, 3053-3066, December 1995.
- ROULSTONE, I. and SEWELL, M.J. Potential Vorticities in Semi-Geostrophic Theory. *Quart. J. R. Meteorol. Soc.*, **122**, 983-992, April 1996.
- MCINTYRE, M.E. and ROULSTONE, I. Hamiltonian balanced models: constraints, slow manifolds and velocity splitting. *Forecasting Research Scientific Paper 41*, Met Office, U.K. This report contains tutorial material, now incorporated into McIntyre and Roulstone (2001); it also contains new results to be resubmitted to *J. Fluid Mech.* The original full

text and *Corrigenda* are archived at the web site <http://www.atm.damtp.cam.ac.uk/people/mem/> 1st September, 1996.

ROUBTSOV, V.N. and ROULSTONE, I. Examples of quaternionic and Kähler structures in hamiltonian models of nearly geostrophic flow. *J. Phys.A.: Math. Gen.*, **30**, L63-L68. 21st February, 1997.

ROULSTONE, I. and SEWELL, M.J. The mathematical structure of theories of semi-geostrophic type. *Phil. Trans. R. Soc. Lond. A* **355**, 2489-2517, 15th December 1997.

ROUBTSOV, V.N. and ROULSTONE, I. Holomorphic structures in hydrodynamical models of nearly geostrophic flow. *Proc. R. Soc. Lond., A* **457**, 1519-1531, June 2001.

MCINTYRE, M.E. and ROULSTONE, I. Are there higher-accuracy analogues of semi-geostrophic theory? In *Large-scale atmosphere-ocean dynamics: Vol 2 Geometric methods and models*. Edited by J. Norbury and I. Roulstone. Cambridge University Press, August 2002. Published as a JCMM Internal Report, 128, June 2001. Available from the JCMM, University of Reading.

BYROM, M. and ROULSTONE, I. Calculating vertical motion using Richardson's equation. *Proceedings of the ECMWF workshop on the assimilation of moisture and precipitation*, European Centre for Medium Range Weather Forecasts, Reading, 8-11 July 2002. Available from ECMWF, Reading, UK.

ROULSTONE, I. Lagrangian Dynamics. In *Encyclopedia of Atmospheric Sciences*, edited by J.R. Holton, J. Pyle and J.A. Curry. Academic Press, 2003.

DIXON, M. and ROULSTONE, I. Controlling imbalance in variational data assimilation using weak constraints. *NWP Technical Report, Met Office*, August 2003.

LORENC, A.C., ROULSTONE, I. and WHITE, A.A. On the choice of control fields in variational data assimilation. *NWP Technical Report, Met Office*, August 2003.

WATKINSON, L.R., LAWLESS, A.S., NICHOLS, N.K. and ROULSTONE, I. Variational data assimilation for Hamiltonian problems. *Int. J. Numer. Meth. Fluids*, **47**, 1361-1367, January 2005.

RIHAN, F.A., COLLIER, C.G. and ROULSTONE, I. Four-dimensional variational data assimilation for Doppler radar wind data. *J. Comp. Appl. Math.*, **176**, 15-34, January 2005.

CULLEN, M.J.P., DOUGLAS, R.J., ROULSTONE, I. and SEWELL, M.J. Generalised semi-geostrophic theory on a sphere. *J. Fluid Mech.*, **531**, 123-157, May 2005.

WHITE, A.A., HOSKINS, B.J., ROULSTONE, I. and STANFORTH, A. Consistent approximate models of the global atmosphere: shallow, deep, hydrostatic, quasi-hydrostatic and non-hydrostatic. *Quart. J. R. Meteorol. Soc.*, **131**, 2081-2107, July 2005.

GHIL, M., BERLOFF, P., BUIZZA, R., HERMANSON, L., MILLER, M., PALMER, T., ROULSTONE, I., SARDESHMUKH, P. and WILLIAMS, P. The Parametrization Problem in Weather and Climate Models. In *Workshop on Representation of sub-grid processes using stochastic-dynamic models*, 6 to 8 June 2005, available from ECMWF, Reading.

ROULSTONE, I., BANOS, B., GIBBON, J. D. and ROUBTSOV, V. N. Kähler geometry and the Navier-Stokes Equations. <http://arxiv.org/abs/nlin/0509023>, September 2005.

GIBBON, J.D., HOLM, D.D., KERR, R.M. and ROULSTONE, I. Quaternions and particle dynamics in the Euler fluid equations. *Nonlinearity*, **19**, 1969-1983, June 2006.

WLASAK, M., NICHOLS, N.K. and ROULSTONE, I. Use of potential vorticity for incremental data assimilation. *Quart. J. R. Meteorol. Soc.*, **132**, 2867-2886, Oct 2006.

WATKINSON, L.R., LAWLESS, A.S., NICHOLS, N.K. and ROULSTONE, I. Weak constraints in four-dimensional variational data assimilation. University of Reading, Depart-

ment of Mathematics, Numerical Analysis Report

http://www.maths.reading.ac.uk/Research/Publications/NA_reports/01-07.pdf

WATKINSON, L.R., LAWLESS, A.S., NICHOLS, N.K. and ROULSTONE, I. Data Assimilation and the 2- and 3-body Problems. In *Oberwolfach Workshop on Mathematical Theory and Modelling in Atmosphere-Ocean Science*, Report 39/2006. Oberwolfach Reports **3**, 2356-59. 2006

WATKINSON, L.R., LAWLESS, A.S., NICHOLS, N.K. and ROULSTONE, I. Weak constraints in four-dimensional variational data assimilation. *Meteorologische Zeitschrift*, **16**, 767-776. December 2007

ROULSTONE, I., BANOS, B., GIBBON, J.D. and ROUBTSOV, V.N. 2009 Kähler geometry and Burgers' vortices. *Zb. Pr. Inst. Mat. NAN Ukr*, **T.6**, No. 2, 303-21, in honour of the 60th birthday of I. S. Krasil'schik.

ROULSTONE, I., BANOS, B., GIBBON, J.D. and ROUBTSOV, V.N. 2009 A geometric interpretation of coherent structures in Navier-Stokes Flows. *Proc. R. Soc. Lond. A* **465**, 2015-21.

Papers to appear:

DELAHAIES, S. and ROULSTONE, I. 2009 Hyper-Kähler geometry and semi-geostrophic theory. Accepted September 2009 *Proc. R. Soc. Lond. A*

Papers submitted:

1.1 Books

NORBURY, J. and ROULSTONE, I. (Eds.) *Large-scale atmosphere-ocean dynamics: Vol. 1 Analytical methods and numerical models; Vol. 2 Geometric methods and models*. 734pp., Cambridge University Press. August 2002.
